(To answer, move the a of actions to the answer area and arrange them in the correct order.)

Answer Area

- Install Windows Server 2012 and SQL Server 2012 on physical machines.
- Configure SERVER02 and SERVER03 as an AlwaysOn availability group.
- Configure SERVER02 as a witness server.
- Configure SERVER03 as a log shipping destination.
- Install Windows Server 2012 and SQL Server 2012 on virtual machines.
- Configure SERVER01 as a principal server and SERVER02 as a mirror server.

Answer: 1, 2, 3;

Answer Area

- Install Windows Server 2012 and SQL Server 2012 on physical machines.
- Configure SERVER02 and SERVER03 as an AlwaysOn availability group.
- Configure SERVER02 as a witness server.
- Configure SERVER03 as a log shipping destination.
- Install Windows Server 2012 and SQL Server 2012 on virtual machines.
- Configure SERVER01 as a principal server and SERVER02 as a mirror server.

Case Study 5: Contoso Ltd (Question 46 - Questions 55) Background You are the SharePoint server administrator for Contoso, Ltd. Contoso has a SharePoint 2010 environment hosted on SharePoint Online and a separate on-premises SharePoint 2010 farm. You are preparing to upgrade the environments to newer versions of SharePoint. You are also planning to support a hybrid on-premises/cloud deployment that will be available to customers, partners, and third-party vendors. Contoso collaborates with a partner company, Tailspin Toys, on multiple projects. Technical Environment All user groups reside in the existing Active Directory Domain Services (AD DS) domain corp.contoso.com. The existing SharePoint Online environment is configured as follows:

- The SharePoint Online URL assigned by Microsoft is <http://contoso.sharepoint.com>.
- The SharePoint Online Administration Center URL is <https://contoso.admin.sharepoint.com>.
- The user name for the Contoso Office 365 administrator is admin@contoso.com.
- An existing line-of-business application provides an OData service that is hosted in Microsoft Windows Azure SQL Database.

The site collections are described in the following table.

Site collection	URL
Corporate projects	https://projects.contoso.com/sites/projects
Partner Projects	https://projects.contoso.com

Business Requirements The upgraded SharePoint environments must meet the following business requirements: All SharePoint 2013 features must be available to all users when connecting from inside or outside of the corporate network. Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook clients and receive content from external users who send email directly to the site. The Corporate Projects site collection must be available to internal users who connect from outside of the corporate network and must not require a VPN connection. Third-party vendors must be able to read and modify documents. **Technical Requirements** You must meet the following technical requirements: - Before upgrading the Partner Projects site collection, create a duplicate, upgraded copy of the site for review and verification purposes. - Use Active Directory Federation Services (AD FS) 2.0 to authenticate Contoso employees, partners, and customers. - Automate the sign-in experience by using the local AD FS 2.0 servers for AD FS single sign-on (SSO). - Ensure that a web usage report that contains traffic reports, search reports, and inventory reports can be provided for any site. The upgraded SharePoint environments must meet the following technical requirements: - All user profile information that resides in Active Directory must be available in SharePoint Online. - All sites must be able to share a mail-enabled document library that resides in the cloud. - The existing line-of-business application must be consumed as an external content type by using Microsoft Business Connectivity Services (BCS). - The Partner Projects site collection must allow Contoso and Tailspin Toys users to share documents with third-party vendors on an ad-hoc basis, without incurring additional licensing requirements. **QUESTION 46** You are configuring DNS for SharePoint Online. You need to create the appropriate type of DNS record. Which type of DNS record should you create? A. A DNS CNAME record pointing to sharepoint.contoso.com. B. A DNS CNAME record pointing to contoso.sharepoint.com. C. A DNS A record pointing to the IP address of the SharePoint Online servers. D. A DNS TXT record containing an Office 365 validation code. Answer: B **QUESTION 47** You need to configure Office 365 to automate the sign-in experience. What should you do? A. Configure AD FS to convert the domain contoso.com to a federated domain. B. Run the New-MsolFederatedDomain-DomainName contoso.com - SupportMultipleDomain Windows PowerShell cmdlet. C. Configure AD FS to add the domain contoso.com as an AD FS federated domain and to support multiple domains. D. Run the Update-MsolFederatedDomain-DomainName contoso.com - SupportMultipleDomain Windows PowerShell cmdlet. Answer: B **QUESTION 48** You need to meet the requirements for the projects.contoso.com site. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.) A. Add the Site Mailbox app to the site. B. Create a distribution list, and add the project team members to the distribution list. C. Add all the project team members to the Members group of the site. D. Create an AD security group, and add all the project team members to the security group. E. Email-enable a document library app on the site. Answer: AC Explanation: * From scenario: Users of the Partner Projects site collection must be able to share content from their Microsoft Outlook clients and receive content from external users who send email directly to the site. A Site Mailbox is a shared inbox in Exchange Online that all the members of a SharePoint Online site can access. It is implemented in SharePoint Online Preview as what is known as an app. An app is best described as a solution that carries a light footprint and uses standards-based technologies such as HTML5, JavaScript, and OAuth. The Site Mailbox is accessible from the site in which it is created. It allow access to users who are individually listed in the Owners and Members groups of the site - security groups or distribution lists are not supported by Site Mailboxes. The email address of the site mailbox will be generated automatically from the name of the site. Site mailboxes are surfaced in Outlook 2013 and give you easy access to the emails and documents for the projects you care about. Site Mailboxes are listed in the Folder Explorer in Outlook 2013 (the rich client), letting you file emails or documents into the shared project space simply by dragging the email, document, or attachment into the site mailbox. <http://blogs.technet.com/b/lystavlenn/archive/2012/08/18/new-feature-site-mailboxes-in-sharepoint-online.aspx> **QUESTION 49** Drag and Drop Question You need to provide access to the Corporate Projects site collection to remote internal users. Which authentication mode and site collection URL should you use? (To answer, drag the appropriate answer choices to the correct location or locations in the answer area. Each answer choice may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

Answer Area

Authentication

Classic-mode authentication

DirectAccess authentication

Forms-based authentication

Host-named site collection

Path-based site collection

Answer:160; 160;

Answer Area	
Classic-mode authentication	Authentication mode
DirectAccess authentication	Site collection URL
Forms-based authentication	DirectAccess authentication
Host-named site collection	Path-based site collection
Path-based site collection	

QUESTION 50 Drag and Drop Question You need to configure the environment to allow replication from the existing domain to Office 365. Which components should you use? (To answer, drag the appropriate products or technologies to the correct location or locations in the answer area. Each product or technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.) 160;

Answer Area	
Purpose	Product or technology
Local area network	
Perimeter network	
User replication	

AD FS 2.0
AD FS 2.0 Proxy
Microsoft Office 365 Exchange Sync Tool
Microsoft Online Services Directory Synchronization tool
SAML token-based claims authentication
Windows Identity Foundation

Answer:160; 160;

Answer Area	
Purpose	Product or technology
Local area network	AD FS 2.0
Perimeter network	AD FS 2.0 Proxy
User replication	Microsoft Online Services Directory Synchronization tool

AD FS 2.0
AD FS 2.0 Proxy
Microsoft Office 365 Exchange Sync Tool
Microsoft Online Services Directory Synchronization tool
SAML token-based claims authentication
Windows Identity Foundation
