QUESTION 169Note: This question is part of a series of questions that use the same or similar answer choices. An answer choice may be correct for more than one question in the series. Each question is independent of the other questions in this series. Information and details in a question apply only to that question.

You have a laptop that is joined to an Active Directory domain. You establish a Wi-Fi connection to a customer's Wi-Fi network. You need to identify whether the current network location of the Wi-Fi connection is private or public. Which Control Panel application should you use? A. Phone and Modem B. RemoteApp and Desktop Connections C. System D. Credential Manager E. Work Folders F. Power Options G. Sync Center H. Network and Sharing Center **Answer: H**

QUESTION 170 You have an on-premises Active Directory domain and a Microsoft Azure Active Directory. You have a Microsoft Intune subscription that is linked to the Azure Active Directory. You configure directory synchronization between the on-premises Active Directory and the Azure Active Directory. You import 100 users into the Azure Active Directory. Users report that they are unable to sign in to Microsoft Intune. You confirm that each user has a valid Active Directory account and password. You open the Microsoft Intune Console and see the configuration of User1 as shown in the exhibit. (Click the Exhibit button.) You need to ensure that the users can sign in to Microsoft Intune. What should you do first? A. Activate the synchronized user accounts. B. Purchase an Enterprise Mobility Suite subscription. C. Configure Microsoft Intune for single sign-on. D. Create a new Security Group in Microsoft Intune named Domain Intune Users. **Answer: A** Explanation: <http://www.robinhobo.com/how-to-setup-microsoft-intune/>

QUESTION 171 You have 100 Windows computers that are managed by using Microsoft Intune. You need to ensure that when a new critical update is released, the update is approved automatically and deployed to the computers within 24 hours of approval. What should you do from the Microsoft Intune administration portal? A. From the Admin node, click Updates, and then create a new automatic approval rule. B. From the updates node, select Critical Updates, and then modify the Approval settings. C. From the Admin node, click Enrollment Rules, and then modify the device enrollment rules. D. From the Policy node, click Configuration Policies, and then create a new Windows policy. E. From the Policy node, click Compliance Policies, and then create a new compliance policy. **Answer: A** Explanation:
