QUESTION 121   You are managing a site collection in a SharePoint farm.   You need to configure the minimum level of permissions necessary for users to manage lists in the site collection.   What permission level should you configure? A.   Limited Access   B.   View Only   C.   Edit   D.   Create   Answer: C   Explanation: The Limited Access permission level is designed to be combined with fine- grained permissions to give users access to a specific list, document library, item, or document, without giving them access to the entire site. However, to access a list or library, for example, a user must have permission to open the parent Web site and read shared data such as the theme and navigation bars of the Web site. The Limited Access permission level cannot be customized or deleted. QUESTION 122   Hotspot Question   A SharePoint environment was set up by using an automated installation script. Corporate policies prevent the use of wizards for installing and configuring server environments.   You plan to provide information from an external business system as metadata values within the environment. Users are not permitted to access this business system directly and the data cannot be exported from the external business system into SharePoint.   You need to ensure that users can access the metadata provided by the external system.   Which service should you configure? (To answer, select the appropriate service in the answer area.)

Answer:
