QUESTION 111 You plan to create a workflow design by using Microsoft Visio 2013 and then import the design into SharePoint Designer 2013. You need to ensure that you have repetition capability. Which shape should you use?
 A. Stage B. Assign a Task C. Step D. Loop Answer: A QUESTION 112 You plan to create a SharePoint Business Process Automation (BPA) project. You need to process items for approval with the least amount of developer effort. Which tool should you use?
 A. Remote Event Receiver B. Out-of-the-box workflow C. SharePoint Designer workflow D. Work Item Timer Job Answer: B QUESTION 113 Contoso uses a SharePoint site that contains subsites. Each subsite represents different projects. Each project site is based on a team site template and stores information and documents. Contoso has five teams: Manufacturing, Sales, Administration, Marketing, and IT. You must create a different look and feel for each team site such that any visitor to the site can identify the team by looking at the colors, fonts, and background image of the site. You need to create a different look and feel for each team. What should you do? (Each correct answer presents part of the complete solution. Choose all that apply.)
 A. Open Contoso Corporate Microsoft PowerPoint Slides Template, save the template as ContosoCorporate.master, and then upload it to the Theme Gallery.
 B. From SharePoint Designer, go to Content Types. Right-click and select Content Type Settings.
 C. Get a site background image for each team and upload it to the site collection images library. Then create a new master page for each team site by using the Master Page Gallery. Set the version to 15.
 D. From the Web Designer Galleries, choose Composed Looks and create a new item for each team site. Specify the title, URL of the master page, theme, background image, and font schema file.
 E. On the Site Settings page in the Look and Feel section, choose Change the look.
 F. Create a new font XML schema with a font specification for each team. Answer: BCD QUESTION 114 A SharePoint farm includes two front-end web servers, one application server, and two clustered servers that run Microsoft SQL Server. The SharePoint Foundation Web Application service is not running on the application server. You plan to configure the SharePoint farm to receive and store email messages and email message attachments in libraries. You need to ensure that users can send email messages and attachments directly to libraries across the entire farm. You must accomplish this goal by using the least amount of effort. Which two actions should you perform? (Each correct answer presents part of the solution. Choose two.)
 A. Install and configure the Simple Mail Transfer Protocol (SMTP) service on each application server.
 B. Install and configure the Simple Mail Transfer Protocol (SMTP) service on each front-end web server.
 C. Enable and start the SharePoint Foundation Web Application service on each application server.
 D. Enable incoming email by using the Automatic settings mode.
 E. Enable and start the SharePoint Foundation Web Application service on each front-end web server.
 F. Enable incoming email by using the Advanced settings mode. Answer: BF Explanation: B (not A): * Incoming email for SharePoint 2013 uses the SMTP service. You can use the SMTP service in one of two ways. You can install the SMTP service on one or more servers in the farm, or administrators can provide an email drop folder for email that is forwarded from the service on another server. * If you are not using a drop folder for email, the SMTP service must be installed on every front-end web server in the farm that you want to configure for incoming email. F (not D): * The basic scenario applies to a single-server farm environment and is recommended if you want to use default settings. The advanced scenario applies to a single-server farm or a multiple-server farm and contains several advanced options from which to choose Verify that the user account that is performing this procedure is a member of the Administrators group on the server that is running the SharePoint

Central Administration website. In Central Administration, click System Settings. On the System Settings page, in the E-Mail and Text Messages (SMS) section, click Configure incoming e-mail settings. If you want to enable sites on this server to receive email, on the Configure Incoming E-mail Select the Advanced settings mode. * To configure incoming email in an advanced scenario etc. Not C, not E: The SharePoint Foundation Web Application service is not running on the application server. Reference: Configure incoming email for a SharePoint 2013 farm QUESTION 115 Hotspot Question You provision a Search service application and a User Profile service application for a SharePoint farm. A company policy requires that an account other than the default content access account must be used for crawling content. You need to configure permissions to crawl the profile store. Which User Profile service application object should you configure? (To answer, select the appropriate object in the answer area.)

Answer: Permissions

QUESTION 116 You are managing a site collection in a SharePoint farm. You need to configure the minimum level of permissions necessary for users to manage lists in the site collection. What permission level should you configure?

A. Contribute B. Read C. Full Control

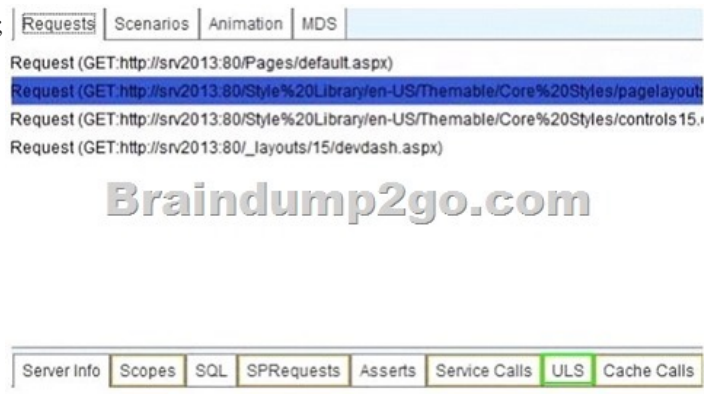

D. Design Answer: D QUESTION 117 Hotspot Question You are troubleshooting a SharePoint app by using the Developer Dashboard. You need to view the events that have been logged for the selected request. Which tab should you select? (To answer, select the appropriate tab in the answer area.)
