QUESTION 141   You create a document reporting Web Part for the Marketing team auditors. You need to configure throttling for the Web Part. Which code segment should you insert at line MA08? A.   spQuery.QueryThrottleMode = SPQueryThrottleOption.Strict;   B.   spQuery.QueryThrottleMode = SPQueryThrottleOption.Override;   C.   spQuery.QueryThrottleMode = SPQueryThrottleOption.Disable;   D.   spQuery.QueryThrottleMode = SPQueryThrottleOption.Default; Answer: B QUESTION 142   You need to create a design package for the publishing sites. What should you do? A.   Use SharePoint Designer to create master pages and a design package.   B.   Use Visual Studio 2012 to create master pages and generate a design package.   C.   Use display templates.   D.   Use Design Manager. Answer: D QUESTION 143   After deploying a solution, a code-based hotfix becomes available. You need to deploy the hotfix. What should you do? (Each correct answer presents part of the solution. Choose all that apply.) A.   Use assembly binding redirection in the web application configuration file.   B.   Increment the assembly file version of the assembly.   C.   Increment the product version of the assembly.   D.   Increment the assembly version of the assembly.   E.   Use assembly binding redirection in the assembly policy file. Answer: AC QUESTION 144   Adventure Works uses SharePoint to store product and order information. Product managers visit the Products list to see the status of each product. They request a feature that will allow them to easily see the recent and old product orders without opening the Products list. The products orders page is located at /sitepages/productorders.aspx, and the product order history page is located at /sitespages/productordershistory.aspx. Both pages require a query string parameter named ProductID . You need to add custom actions to the Products list by using the least amount of administrative effort. What should you do? A.   Add an empty element to the SharePoint project. Add a <CustomAction> tag, set the Location element to EditControlBlock, and then use the <UrlAction> tag for a redirect to the custom page.   B.   Create a Windows Application and add a reference to Microsoft.SharePoint.Portal.CustomActions.dll   and use the SPCustomActions class to add a custom action.   C.   Open the site in SharePoint Designer. Create a custom List Item Display Template and then apply it   to the Products List View Web Part.   D.   Create a visual Web Part. Use a grid view with a template column and hyperlink, and databind the   Products list. Add the Web Part to the allItems.aspx page of the Products list. Answer: D QUESTION 145   Your network contains an Active Directory forest The forest contains a single domain named adatum.com.   The network contains a SharePoint Server 2013 server farm. The farm contains a single web application named Web1. Users connect to Web1 by using the URL http://webl.adatum.com.   You need to configure the People Picker control to display only users who are members of organizational units (OUs) named Managers and Contractors.   What should you do? A.   Modify the User Information List of the site collection. B.   Set the Peoplepicker-setsiteuseraccountdirectorypath property of the site collection.   C.   Set the Peoplepicker-searchadforests property of the site collection.   D.   Modify the User Policy of Web1. Answer: B Explanation: Operation name: Setsiteuseraccountdirectorypath Sets the site user account directory path to a specific organizational unit (OU) in the same domain when the url and pathparameters are specified.   * Example   To set a list of users to a specific OU (for example, Sales) in the Contoso Corp domain, use the following syntax: stsadm -o setsiteuseraccountdirectorypath -path "CN=Sales,DC=ContosoCorp,DC=local" ?rl http://server_name QUESTION 146 Drag and Drop Question Your company has an internal network and a perimeter network. The internal network contains an Active Directory domain.   You plan to deploy a SharePoint Server 2013 server farm. The farm will contain a single web application that uses NTLM authentication by using the

domain controller on the internal network.   The relevant components on the network are listed in the following table.

Component
Server1
Server2
Firewall1
Firewall2

All services use default TCP ports.   You need to configure the inbound rules for Firewall1 and Firewall2 to ensure that users from the Internet can access content in the farm by using either HTTP or HTTPS.   What should you configure? 0"o answer, drag the appropriate TCP ports to the correct firewalls.   Each port may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

TCP Ports	Answer Area		
80	Firewall1:	Port	Port
289	Firewall2:	Port	Port
443			
1433			
32843

QUESTION 147   You have a SharePoint Server 2013 server farm.   You need to view the errors generated by a Web Part.   What should you use? A.   The administrative reports   B.   The SharePoint trace logs   C.   The site collection health checks   D.   The SharePoint Health Analyzer Answer: B   QUESTION 148   Drag and Drop Question   You are planning the search components for a SharePoint Server 2013 server farm.   You have a content source named CS1 that contains all of the local SharePoint content.   You upload a display template named DT1.   You need to configure searches to meet the following requirements: - If a user types a search query that contains the word slidedeck, the search results must include only files that have either the .ppt file extension or the .pptx file extension.   - The local SharePoint content must be indexed one document at a time.   - DTI must be used to display results that have the .mp4 file extension.   Which components should you use to achieve each requirement? (To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.)

| Components	Answer Area	
authoritative pages	If a user types a search query that contains the word slidedeck, the search results must include only files that have either the .ppt file extension or the .pptx file extension.	Component
crawler impact rules		
query rules	The local SharePoint content must be indexed one document at a time.	Component
result sources		
result types	DT1 must be used to display results that have the .mp4 file extension.	Component

QUESTION 149   You have a SharePoint Server 2013 server farm. The farm has the following service applications: - Secure Store Service   - Search Service Application   - Word Automation Services   - Managed Metadata Service   - User Profile Service Application   You need to be able to send and receive email from a SharePoint site.   What should you do first? A.   Create a Work Management Service application.   B.   Configure self-service site creation.   C.   Create an App Management Service application.   D.   Configure alternate access mappings.   Answer: C   QUESTION 150   You have a SharePoint Server 2013 server farm.   Active Directory attributes are imported to user profiles.   You need to ensure that if users change the mobile phone number in their SharePoint user profile, the new information will be copied to their Active Directory user account.   Which Active Directory permission should you assign to the synchronization account? A.   Read All Properties   B.   Manage Replication Topology   C.   Write All Properties   D.   Replicate Directory Changes Answer: C   Explanation: http://technet.microsoft.com/en-us/library/ff182925(v=office.15).aspx   The synchronization account for a connection to Active Directory Domain Services (AD DS) must have the following permissions: It must have Replicate Directory Changes permission on the domain with which you'll synchronize.   Note: The Replicate Directory Changes permission enables the synchronization account to read AD DS objects and to discover AD DS objects that have been changed in the domain. The Grant Replicate Directory Changes permission does not enable an account to create, modify or delete AD DS objects.
