servers:- A server named App1 that has System Center 2012 App Controller installed.- A server named Portal1 that has the Windows Azure Subscription Management Portal installed.- A server named Server1 that has Active Directory Certificate Services (AD CS) installed. You need to configure a connection from App1 to a Windows Azure subscription. The solution must ensure that you can manage the subscription from Portal1. You issue a certificate from Server1 and then export it. What should you do next?

(Each correct answer presents part of the solution. Choose two.) A. From App1, import the certificate. B. From Portal1, import the certificate. C. Request a new certificate to be used on App1. D. Request a new certificate to be used on Portal1. Answer: AB

http://kevingreeneitblog.blogspot.com/2011/11/cloud-management-with-system-center_3126.html QUESTION 24

Your company has three data centers located in New York, Los Angeles and Paris. You deploy a System Center 2012 Virtual Machine Manager (VMM) infrastructure. The VMM infrastructure contains 2,000 virtual machines deployed on 200 Hyper-V hosts. The network contains a server named DPM1 that has System Center 2012 Data Protection Manager (DPM) installed. You need to recommend a solution for the infrastructure to meet the following requirements:- Automatically backup and restore Virtual machines by using workflows.- Automatically backup and restore system states by using workflows. What should you include in the recommendation?

(Each correct answer presents part of the solution. Choose two.) A. Deploy System Center 2012 Orchestrator. B. Install the Integration Pack for System Center Virtual Machine Manager (VMM). C. Install the Integration Pack for System Center Data Protection Manager (DPM). D. Deploy System Center 2012 Operations Manager. E. Deploy System Center 2012 Service Manager. Answer: AC

Explanation: <http://technet.microsoft.com/en-us/library/hh420337>

<http://technet.microsoft.com/en-us/library/hh830726.aspx> QUESTION 25

You have a System Center 2012 Service Manager infrastructure and a System Center 2012 Operations Manager infrastructure. You enable the Alert Connector in Service Manager. Operations Manager has the Microsoft SQL Server Monitoring Management Pack installed. You plan to configure the Alert Connector to receive SQL Server alerts from Operations Manager. You need to prepare the Service Manager infrastructure for the planned configuration. Which two tasks should you perform? (Each correct answer presents a complete solution. Choose two.) A. Install the SQL Server Notification Services. B. Enable the Operations Manager CI connector. C. Import the SQL Server Management Pack. D. Create a runbook. E. Create a notification channel. F. Create an incident template. Answer: BC

Explanation: B: In System Center 2012 Service Manager, there are two types of connectors for System Center Operations Manager. You use the first type of connector, the alert connector, to automatically generate incidents that are based on Operations Manager alerts. You use the second type of connector, the configuration item (CI) connector, to import discovered objects from Operations Manager as configuration items into the Service Manager database. C: * You must import some System Center Operations Manager management packs into Service Manager. When you install Service Manager, a set of System Center Operations Manager management packs for common objects and the required Windows PowerShell scripts are copied to your Service Manager installation folder. * For the Operations Manager CI connector to function correctly, you have to import a set of management packs into Service Manager. <http://technet.microsoft.com/en-us/library/hh524325.aspx> QUESTION 26

Your network contains an Active Directory domain named contoso.com. Certificate autoenrollment is configured for all client computers in the domain. You install System Center 2012 Virtual Machine Manager (VMM) on a server named Server1. You install the Virtual Machine Manager Self-Service Portal (VMMSSP) on Server1. Users report that they receive the message shown in the exhibit when they connect to the VMMSSP. (Click the Exhibit button.) You need to ensure that the users connect to the VMMSSP by using HTTPS. What should you do? A. From the Certificates console, add a Cross-Certificate download URL. B. From Internet Information Services (IIS) Manager, modify the binding settings. C. From the VMM Administrator Console, modify the Network Settings. D. From Internet Information Services (IIS) Manager 6.0, modify the security communication settings. Answer: B

Explanation:

<http://technet.microsoft.com/en-us/library/dd548288.aspx> QUESTION 27

You have a System Center 2012 Service Manager

infrastructure that contains two servers named Server1 and Server2. A user named Testuser5 is unable to modify work items and configuration items. You need to ensure that TestUser5 is assigned the necessary permissions to perform the following tasks:- Create and update work items.- Create and update configuration items. To which User Role Profile should you add TestUser5? A. Change InitiatorsB. Problem AnalystC. Incident ResolversD. Advanced Operators Answer: DExplanation:

<http://technet.microsoft.com/en-us/library/ff461054> QUESTION 28You have a System Center 2012 Service Manager infrastructure that contains a single server named Server1. You plan to use a new account named Service1 as the Operational Database Account. You plan to configure Server1 to use a new account named Service1 as the logon account for the System Center Data Access Service. You need to identify which roles must be assigned to Service1.Which two roles should you identify? (Each correct answer presents part of the solution. Choose two.) A. the Service Manager Administrators User Role ProfileB. the Microsoft SQL Server db_ddladmin fixed database roleC. the Service Manager Workflows User Role ProfileD. the Service Manager Advanced Operators User Role ProfileE. the Microsoft SQL Server configsvc_users database roleF. the Microsoft SQL Server sdk_users database role Answer: AFExplanation:<http://technet.microsoft.com/en-us/library/hh495527.aspx> suggests that A, E and F are required (Service Manager Administrators User Role Profile, configsvc_users database role and sdk_users database role) but the question is asking for just two answers.<http://technet.microsoft.com/en-us/library/hh495527.aspx> doesn't mention the

configsvc_users database role as below so the answer is A and F.System Center Configuration service and System Center Data Access service account:This account is one set of credentials that is used to update and read information in the operational database. Operations Manager ensures that the credentials used for the System Center Data Access service and System Center Configuration service account are assigned to the sdk_user role in the operational database. QUESTION 29You have a System Center 2012 infrastructure that contains the following:- Orchestrator- Service Manager- Virtual Machine Manager(VMM)The corporate compliance policy states that the following tasks must be audited:- When an administrator updates a service.- When a user requests a change to a service.- When an administrator approves a change to a service.You need to recommend a solution that meets the requirements of the compliance policy.Which portal should you include in the recommendation? A. the App Controller portalB. the Service Manager Self-Service PortalC. the Virtual Machine Manager Self-Service Portal (VMMSSP)D. the Virtual Machine Manager Self-Service Portal (VMMSSP) 2.0 Answer: BExplanation:

<http://blogs.technet.com/b/servicemanager/archive/2010/02/04/action-log-history-and-auditing-in-service-manager.aspx>
